# B2B Engagement Strategy: Technical Working Groups

It is critical for the BCPNG to gather, articulate and advocate its priorities in the 2 signature policies (MTDP IV and IMF Credit Facility) and also in the 2 competing international orders (China vs. Australia).

# 2025 BCPNG DATA STRATEGY

- i** **Key Problem:** government policy and practice is limiting private sector to be active in nation building. This is largely due to its inability to measure its capacity in been a productive partner.
- i** **Objective:** establish data strategy to measure productivity of business to be productive in Papua New Guinea's development activities.
- i** Key Features are design indicators to measure factors impacting: human capital productivity; business performance sales; sectors in the market to be efficient; key government agencies regulating business.
- i** **Partners:** Gov, Business and Dev Partners.
- i** **Outcome:** Economic, Social and National Security sectors are supporting business led growth.
